ACKNOWLEDGEMENT

In a time where health and wellness have become increasingly pivotal, developing a website to sell healthy food and products for those committed to clean eating and fitness has become essential. Recognizing the potential of this market and less competition compared to other industries, our team developed a platform for people that follow a healthy lifestyle.

Our website is designed to serve health-conscious consumers by offering a selection of nutritious food products, gym essentials, and other items that support a clean diet. This market not only offers high profit potential due to the value of the products, capitalizing on the growing trend of health and fitness, but also allows for additional services like personalized nutrition advice and custom menu planning.

We would like to thank our lecturer, PhD. Tran Duy Thanh, for your invaluable support and guidance throughout the development of this project. Your expertise has been key in developing and shaping our platform, and your encouragement has been vital to our success for this project.

COMMITMENT

Dear PhD. Tran Duy Thanh,

Subject: Web Business Development

Our team is fully committed to the development of a website dedicated to selling healthy food and products for individuals who prioritize clean eating and fitness. This initiative aims to provide high-quality products and services that support a healthy lifestyle. This commitment includes several key aspects:

1. Project Scope and Objectives:

- Clearly defining the project's scope, including its objectives, functionalities, and features.
- Aligning the project with the academic requirements and learning outcomes specified for our final project.

2. Timelines and Deliverables:

- Setting clear timelines with achievable milestones, ensuring the project is completed within the agreed timeframe.
- Delivering features as planned, including user-friendly navigation, secure payment options, and customer support.

3. Resource Allocation:

- Allocating the necessary human and technological resources to support the development process effectively.
- Ensuring access to relevant tools, software, and infrastructure essential for the project's execution.

4. Collaboration and Documentation:

- Promoting teamwork and open communication among all team members to foster creativity and efficiency.
- Ensuring regular updates on the project's progress to maintain accountability and transparency.

5. Quality and Continuous Improvement:

- Maintaining the highest quality standards for our website's design, content, and product selection.
- Embracing feedback from users and stakeholders to continuously improve the platform.

By formalizing this commitment, our team affirms to create a robust and user-friendly website that meets the expectations of our target audience. We are dedicated to making this project a success, contributing to both the health-conscious community and our professional growth.

Thank you for your support and trust in this endeavor.

ABSTRACT

FIT&FRESH.VN is an e-commerce platform designed to meet the growing demand for healthy food and wellness products in Vietnam. Aimed at health-conscious consumers, it offers a range of nutritious foods, snacks, and fitness products, supported by features like personalized meal plans and dietary consultation. This project documents the development process, from market analysis and system design to implementation using technologies like Angular, MongoDB, and Node.js.

The platform focuses on providing a seamless shopping experience, with features tailored to busy urban lifestyles and a commitment to sustainability. This report covers key aspects of the project, including system architecture, user experience, and backend functionality. Challenges like competing with established platforms and technical limitations are addressed, along with plans for future enhancements, such as improved payment options and AI-driven product recommendations.

In essence, FIT&FRESH.VN seeks to be a trusted source for health and wellness products, supporting customers' goals for a healthier lifestyle in a convenient, sustainable way.

CHAPTER 1. PROJECT OVERVIEW

1.1. Overview

1.1.1 Reasons for choosing the topic

Nowadays, the global health and wellness market has been experiencing significant growth as more people become aware of the importance of proper nutrition and fitness for maintaining a healthy lifestyle. In particular, the eat clean movement and fitness-focused diets have gained popularity, especially among younger generations who seek convenient and trustworthy sources for high-quality, nutritious food.

Despite the demand, the market still faces a gap in providing easy access to specialized healthy food products, especially for those following strict dietary plans such as clean eating or fitness routines. Many existing platforms are generalist in nature and do not cater specifically to this niche, making it difficult for customers to find and trust the right products that meet their needs. This project aims to fill that gap by creating a specialized platform that focuses solely on providing clean, nutritious food and gym-related products.

Additionally, the rise of e-commerce, driven by changing consumer behavior towards online shopping, further supports the need for a well-designed platform dedicated to healthy living. The website will not only serve as a marketplace but also as an educational resource to help customers make informed choices about their health and diet. This will provide a competitive advantage by meeting the increasing demand for convenience, transparency, and healthy product options in a growing and evolving market.

1.1.2 Market Research and Competitor Analysis

1.1.2.1. Market Research

The Healthy Food market is growing strongly in the world and Vietnam is no exception to this trend. As a result, the demand for healthy food consumption in Vietnam is

increasing, as people are increasingly concerned about their health and quality of life. Of the 3,081 discussions about motivations for changing to healthier eating habits, 31% of discussants said it would improve their overall quality of life. In addition, 20.6% of the discussion said that "healthy eating" will help them prevent and treat diseases better, avoiding the use of antibiotics and other drugs.

Vì sao người tiêu dùng Việt muốn theo chế độ ăn uống lành mạnh?

(Sources: YouNet Media)

In addition, the healthy food market is growing strongly in Vietnam. According to Nielsen statistics, the healthy food market in Vietnam reached a value of 1.2 billion USD in 2022 and is expected to grow at a rate of 15% per year in the period 2023-2027.

1.1.2.2. Competitor Analysis

Koko Green: Not only specializing in pure fruit drinks, Koko Green also focuses on Low Carb dishes that are beautiful, delicious, not boring and effectively reduce fat. Dishes are changed weekly, the menu is diverse, the nutritional content is carefully researched, ensuring healthy weight loss.

Goom – Healthy Foods & Beverages: Goom is famous for its Kombucha tea, organic nut milk and dishes with natural ingredients. Goom is the pioneer of a new eating movement, with the criteria of delicious - cheap but nutritious and good for health. Kombucha tea is naturally fermented with fruits such as plums, star fruit, apricots, mulberries... bringing a sweet and sour taste, with gas, extremely good for the digestive system, boosting immunity, preventing cancer... Besides drinks, Goom also has a variety of dishes including: rice, vermicelli, salad, hot pot... delicious, safe. The restaurant uses bamboo or paper straws, food containers made from sugarcane bagasse, glass bottles, cloth bags to both take care of health and protect the environment.

Fitfood Vietnam: Fitfood Vietnam provides weekly meals to help maintain a healthy lifestyle with a diverse menu with more than 100 dishes.

Mr.Eco: Regarding products, Mr.Eco currently provides a variety of healthy food products, including packaged products: cakes, brown rice, tea... and instant products such as salad, brown rice, brown rice noodles, juice... The common feature of these products is that they are all good for health, processed in a variety of forms so that customers do not feel bored. Each product is carefully invested in researching the ingredients to ensure that each meal controls each nutrient. In addition, Mr.Eco also provides weekly and monthly meal combos, serving customers who eat healthy food regularly.

1.1.3 Business Project

1.1.3.1 Qualitative Objectives

In addition to generating commercial success, the website for healthy food and fitness products is designed to deliver a range of practical benefits to customers, focusing on convenience, accessibility, and brand communication.

Value Proposition

- The website offers an additional shopping channel that simplifies the customer journey. It saves time while providing detailed information about healthy food, making it easier for customers to make informed decisions.
- It contributes to an integrated customer experience across multiple channels, enabling the brand to attract and engage its target audience more effectively. The platform supports online consultations, tailored advice, and effortless shopping.
- By encouraging direct interaction between the brand and its customers, the website becomes a critical communication tool, building stronger customer relationships through feedback loops, support, and product recommendations.
- The site serves as a key element of the brand's identity, not just reflecting its values but also reaching a broader audience, particularly those who might not engage with physical stores. This extends brand recognition and increases the impact of promotional campaigns and product launches.
- It allows for the collection of customer insights, which can be used to shape product development and marketing strategies, aligning the brand more closely with customer preferences and behaviors.

User Experience

- The platform offers essential e-commerce features while enhancing the overall user experience. It ensures that customers have a streamlined and intuitive path to purchase, with optimized operations that simplify the process from product selection to checkout.

- A standout feature is the "Personalized Meal Plan" tool, enabling users to create custom diet plans aligned with their fitness goals and preferences. This adds value beyond a basic shopping experience, offering a personalized approach to nutrition.
- Users can explore a wide variety of content, including health blogs, nutritional tips, and community interactions. The platform is more than just a store; it's a wellness hub.
- The design prioritizes clarity and ease of use, presented in Vietnamese to cater to the local market. The overall style is sleek and modern, with a fresh and vibrant color palette that reflects the brand's commitment to healthy, active living.

1.1.3.2 Business Objectives

This healthy food products platform is geared toward individuals who prioritize fitness and nutrition, whether they are gym-goers, athletes, or anyone committed to clean eating and an active lifestyle.

- **Target Market:** The platform caters to a growing audience of health-conscious consumers who are looking for convenient and nutritious meal options. It addresses the needs of busy urban professionals, fitness enthusiasts, and anyone looking to make healthier lifestyle choices.
- **Core Offerings:** The website features a carefully selected range of products, including organic foods, dietary supplements, ... A key differentiator is the availability of customized meal plans that can be tailored to individual customer needs, making it easier for them to achieve their health and fitness goals.
- **Mission:** The brand's mission is to provide high-quality, health-focused products that empower customers to lead better, more balanced lives. By combining nutritious food options, the platform aims to be a trusted partner in its customers' health journeys.
- **Sustainability:** The brand places a strong emphasis on sustainability, using eco-friendly packaging, sourcing organic and locally-produced products, and

promoting practices that reduce waste. This commitment resonates with the brand's values and appeals to environmentally conscious consumers.

1.1.3.3 Brand Differentiation

The platform distinguishes itself by focusing on the specific needs of urban consumers who value health and convenience.

- **Unique Customer Focus:** The brand understands that many customers, particularly those living in fast-paced cities, struggle to maintain a healthy lifestyle. The website offers simple, time-saving solutions that help customers stay on track with their goals.
- **Personalized Service:** Unlike many competitors that focus solely on either general health foods or fitness-specific supplements, this platform offers a specialized range of healthy food options tailored specifically for individuals leading an active, fitness-oriented lifestyle. Customers can choose from a wide selection of products designed to meet their unique dietary needs and fitness goals, offering a personalized experience that aligns with their health and wellness journey.
- **Competitive Edge:** By offering a wide range of healthy food and nutritional supplements on one platform, the website provides a convenient solution for health-conscious individuals and gym enthusiasts to meet their dietary and wellness needs in one place. With a strong emphasis on sustainability and catering specifically to urban, fitness-focused consumers, the brand is positioned to capture a niche market that is often overlooked by traditional food retailers, who may not offer the same level of specialized, health-oriented products.

The website will emphasize a user-friendly interface and responsive design, catering to both mobile and desktop users. It will reflect the vibrant and dynamic energy of a healthy lifestyle, aligning with the brand's promise of supporting fitness and well-being.

1.2. About our brand

1.2.1. Brand Overview

Table 1.1. Brand Overview

Idea Name	A website to sell healthy food and products for people who prioritize healthy lifestyle
Brand Name	FIT&FRESH.VN
Slogan	Your green corner
Inspiration	The name <i>FIT&FRESH.VN</i> reflects the brand's focus on promoting a healthy lifestyle. "<i>FIT</i>" represents the active, health-conscious individuals who prioritize fitness and well-being. "<i>FRESH</i>" highlights the importance of natural, wholesome food choices. Together, the name symbolizes the connection between staying active and eating fresh, nutritious products. "<i>Your green corner</i>" embodies the essence of creating a personal space where health and wellness are prioritized. "Green corner" conveys the idea of a fresh, natural space where customers can find the support they need to live healthier, more balanced lives. Together, the slogan invites people to discover their own corner of well-being with FIT&FRESH.VN, where fitness and fresh choices meet in harmony.
Category	Healthy meals, nuts, beverages, milk, snacks

1.2.4. Business Partner (Suppliers)

1. Organica: Specializes in organic vegetables and fruits, meeting international organic standards. Ideal for providing fresh ingredients that ensure food safety and quality.
2. Minh Phuong Fruits: Distributes high-quality imported fruits, ideal for fresh fruit ingredients in healthy meals or beverages.

1.2.5. SWOT Model

Figure 1.3. Analyzing SWOT Model of FIT&FRESH.VN

(Sources: Authors' Source)

Strengths: This niche targets the increasing demand for healthy food and fitness products, appealing to health-conscious consumers. It emphasizes high-quality, fresh, and nutritious products, catering to those seeking a healthier lifestyle. Additionally, personalized services such as nutrition consulting and custom meal plans add value, fostering customer loyalty and engagement.

Weakness: The health food market is highly competitive, with both established brands and new entrants. As a newcomer, building brand recognition and trust will be challenging. Additionally, relying solely on e-commerce may restrict the customer base to tech-savvy consumers, potentially missing out on offline sales opportunities.

Opportunities: Growing health trends present opportunities as more people prioritize fitness, healthy eating, and clean living. A focus on sustainability, like using eco-friendly packaging, can appeal to environmentally conscious customers. Additionally, offering personalized meal plans and nutrition advice helps distinguish the brand in a competitive market.

Threats: Healthy products' higher costs may drive price-sensitive consumers to cheaper options. Fresh food also encounters supply chain issues, including spoilage and inconsistent ingredient availability. Additionally, shifting health trends require constant innovation to align with new diets and fitness fads.

1.3. Customer Analysis

1.3.1. Target Customers and Potential Customers

1.3.1.1. Target Customers

FIT&FRESH.VN is an online platform offering healthy food products and supplements tailored for individuals interested in "eat clean" diets, fitness, and overall wellness. The key target customer segments include:

Health-conscious individuals (Aged 18-45): These are individuals who prioritize maintaining a healthy lifestyle, particularly focusing on their dietary habits. They are likely to follow nutritional trends such as low-carb, high-protein, gluten-free, and plant-based diets.

Fitness Enthusiasts and Gym-goers: Regular gym attendees and fitness enthusiasts, often aged between 18-35, who actively participate in physical activities and focus on fitness goals such as muscle gain, weight loss, and body toning. These individuals require a balanced intake of protein, vitamins, and supplements to fuel their performance.

Young Professionals (Aged 22-35): This demographic comprises busy young professionals who value the convenience of ready-made or easy-to-prepare healthy meals. They have disposable income and are willing to pay for quality and convenience, especially if it aligns with their health goals.

Urban Dwellers: People living in urban areas, particularly in large cities, where the pace of life is fast, and access to convenient, nutritious meals is limited. They are likely to shop online for groceries and meal plans that suit their healthy lifestyles.

Diet-conscious Consumers (Aged 25-40): Individuals who are on specific diets such as keto, vegan, gluten-free, or low-calorie diets. They may have dietary restrictions or preferences and seek food products that align with their needs.

Individuals with Chronic Health Conditions: People suffering from conditions such as diabetes, obesity, or heart diseases, who are advised by healthcare professionals to adopt healthier eating habits. They often seek nutritious, clean-labeled food options to manage their health better.

1.3.1.2. Potential Customers

Aspiring Fitness Participants: Individuals who are just beginning their fitness journey and are exploring ways to improve their health and diet. This group is likely to be influenced by trends, social media, and fitness communities.

Parents of Young Children: Parents, especially mothers, looking to provide healthy meals for their children and family. They may seek out organic, non-GMO, and preservative-free food options to ensure the well-being of their family members.

Elderly Population: The aging population, particularly those who have developed a greater awareness of the importance of nutrition for longevity and quality of life. They may be looking for products to support specific health conditions related to aging, such as bone density or cardiovascular health.

1.3.2. Customer Insights

1.3.2.1. Behavior Patterns

Preference for Online Shopping: Many customers in this market segment prefer shopping online due to the convenience it provides. They value quick delivery, product transparency, and easy access to nutritional information. A user-friendly website that enables easy browsing, along with clear product descriptions and nutritional breakdowns, will be essential.

Trend-driven Consumption: The target audience is often influenced by current dietary and fitness trends. Social media plays a key role in shaping their purchasing decisions. Products that align with popular fitness regimes (e.g., keto, vegan, paleo) are likely to attract attention.

Focus on Ingredient Transparency: Modern health-conscious consumers are highly aware of what they are putting into their bodies. They look for products with clean labels—free from artificial additives, preservatives, or excessive processing. They are more likely to trust brands that provide full ingredient transparency and nutritional facts.

Seeking Convenience without Compromising Health: Many of FIT&FRESH.VN's customers are busy professionals or parents who seek convenient meal solutions that do not compromise their health goals. Ready-made or easy-to-prepare meals, meal kits, and snacks that cater to specific dietary needs (high-protein, low-carb, etc.) will attract this segment.

Willingness to Pay for Quality: Health-conscious consumers are generally willing to spend more on high-quality, organic, or specialized food products. They associate price with value, particularly in terms of health benefits, product sourcing (e.g., organic, sustainably farmed), and ethical production practices.

3.2.2. Motivations and Challenges

Motivations: Customers are driven by the desire to improve their physical well-being, fitness performance, and overall health. Many are motivated by fitness goals (e.g., weight loss, muscle gain) or health concerns (e.g., managing cholesterol or blood sugar

levels). Aesthetics, such as improving physical appearance, also plays a motivating role for many customers.

Challenges: Time constraints and limited availability of healthy food options can be barriers. For instance, many customers face difficulties in finding trustworthy products that meet their dietary preferences or requirements in local stores. In addition, they may struggle with balancing a healthy diet with other aspects of their busy lives, such as work and family responsibilities.

1.3.2.3. Key Influences:

Social Media and Influencers: Fitness and health influencers on platforms like Instagram, YouTube, and TikTok significantly influence purchasing behavior. Consumers often look to these influencers for product recommendations, workout tips, and meal ideas.

Community and Peer Influence: Many customers are part of online or offline fitness and wellness communities, which create a sense of belonging and shared goals. Peer recommendations, either from gym buddies or members of wellness groups, can play a vital role in driving brand loyalty.

1.3.2.4. Digital Engagement

Mobile-friendly Shopping Experience: Customers are tech-savvy and spend significant time on their mobile devices. A mobile-responsive website, seamless payment options, and fast-loading pages are crucial for retaining this segment.

Content Consumption: Health-conscious consumers often seek educational content related to nutrition, fitness, and well-being. Offering informative blogs, product guides, meal planning tips, and workout suggestions can help build trust and position FIT&FRESH.VN as a thought leader in the industry.

1.4. Business Model

1.4.1. Business Strategy

FIT&FRESH.VN is a brand specializing in healthy products with ***focused market niche strategy***. This means we concentrate on tapping into the most potential market segment and providing tailored product/service packages to specific customer needs. We particularly emphasize serving individuals interested in "eat clean" diets, fitness, and overall wellness, with average incomes and an interest for a healthy balanced diet.

We recognize that people in the aforementioned segments have huge concerns about their health but somehow they may find it hard to find and maintain suitably nutritious and healthy diets. Besides, they also highly value the quality and origin of food and drink. Therefore, this strategy helps us focus on developing and maintaining effective relationships with this specific customer group and maximizing benefits for both parties.

We not only focus on selling our products but also on building a unique purchasing experience, from creating quality products to providing personalized diet consulting services so customers can possess their own menus that ensure the nutrition and health in their food, balance and develop clean eating habits. By doing so, we establish a strong relationship with customers and build loyalty and trust in our brand within the healthy food market.

1.4.2. Revenue Model

Table 1.4. Revenue Model

Sales Revenue Model	The primary revenue stream comes from the direct sale of healthy food products, such as healthy nuts, healthy beverages, healthy milk, healthy meals,.. catered to customers following clean eating and fitness-focused diets.
----------------------------	--

Subscription Revenue Model	Offer subscription-based services where customers can sign up for regular deliveries of curated meal boxes or pre-planned healthy meals. This provides a recurring revenue stream and builds customer loyalty.
-----------------------------------	--

1.4.3. Payment and Delivery Methods

1.4.3.1. Payment Method:

Customers can make payments through the following methods:

- ***Cash on Delivery (COD):*** Allows customers to pay upon receiving the product.
- ***Internet Banking:*** Payment via bank transfer.
 - Bank: MB BANK - 0817948093
 - Account Holder: **TRAN THI THUY LOI**
- ***E-wallet [Momo, Zalopay]:*** 0817948093 - TRAN THI THUY LOI

1.4.3.2. Delivery Methods

Through our official website: delivery policy will apply to all customers when ordering through the website. FIT&FRESH.VN cooperates with express delivery service so shipping fee will be decided by the cooperating unit and calculated together with the customer's order.

As a result, complete and accurate information is required when a customer places an order to facilitate the delivery of the order. FIT&FRESH.VN is not responsible for late deliveries or lost orders due to customers providing incorrect information. Shipping fees will be calculated according to the GHN unit's fee.

It is also noticeable that inner HCM city customers will receive their order 15 to 45 minutes after placing the order depending on the area. Meanwhile, Provincial Orders (except for Healthy meals) will arrive within 2-3 days (except Sunday).

BẢNG GIÁ GIAO HÀNG

Đơn vị: VND (Đã bao gồm 8% VAT)

TUYẾN	GÓI DỊCH VỤ	KHỐI LƯỢNG	NỘI THÀNH	HUYỆN/XÃ	THÊM 0.5 KG	THỜI GIAN GIAO
Nội Tỉnh (trừ Hà Nội, Hồ Chí Minh)	Đi bộ	0 - 3Kg	15.500	29.000	2.500	1 ngày
Nội Tỉnh (áp dụng cho Hà Nội, Hồ Chí Minh)	Đi bộ	0 - 0.5 Kg	21.000	29.000	2.500	1 ngày

Figure 1.4. Giao Hang Nhanh's fee schedule

(Source: <https://ghn.vn/pages/bang-gia-moi-sieu-tiet-kiem>)

1.4.4. Customer Care and Support Services

To ensure customer satisfaction and meet the needs of health-conscious consumers, the website provides a comprehensive range of after-sales customer care and support services, including:

- **Nutritional guidance:** Customers receive detailed information on how to incorporate healthy foods and supplements into their daily diets. Guidance includes meal planning tips, portion control, and how to use specific products to achieve fitness and health goals.
- **Diet and fitness consultations:** The platform offers personalized consultations for customers who want advice on designing balanced meal plans or selecting the right supplements for their lifestyle. This service helps customers align their dietary choices with their fitness objectives, such as weight loss, muscle gain, or overall wellness.
- **Product guarantee and quality assurance:** The website provides clear policies on product quality and freshness, ensuring customers receive high-quality products. In case of any issues, customers can rely on straightforward return or exchange processes to guarantee their satisfaction.
- **Custom meal plan recommendations:** Based on customers' individual goals and preferences (vegan, keto, or high-protein diets,...), the platform provides

suggestions on suitable products. This helps customers make informed decisions that maximize the benefits of their health journey.

These customer care and support services aim to enhance customer experience and loyalty, ensuring that products are used effectively to support each customer's health and fitness goals.

CHAPTER 2. THEORETICAL BACKGROUND

2.1. NodeJS

2.1.1. Introduction

Platform JavaScript runtime environment that enables developers to run JavaScript on the server side. Traditionally, JavaScript was used mainly for client-side scripts in web browsers. Node.js expands its capabilities to the server, allowing developers to build scalable, high-performance web applications and APIs.

Node.js uses Google's V8 JavaScript engine, which compiles JavaScript directly into native machine code, making it fast and efficient. It's well-suited for building real-time applications, such as chat applications, gaming servers, and APIs, especially those with high I/O operations like file system access or database queries.

- **Structure:** Node.js follows a modular structure that helps break down the source code into manageable and reusable components. Here are the essential parts of the Node.js architecture:
- **Module:** Node.js relies heavily on the concept of modules, which allows developers to separate the code into independent, reusable units. These can range from individual JavaScript files to complete libraries and frameworks with extensive features. Modules help in organizing and maintaining the code more efficiently, promoting better reusability across different parts of an application.
- **Console:** Console is a module that provides methods to output information to the console memory. It's useful for debugging and monitoring the application's state during development. Methods like `console.log()`, `console.error()`, and `console.warn()` are essential for tracking the application's behavior and outputting information at runtime.
- **Cluster:** The cluster module enables Node.js to utilize multiple CPU cores by allowing the creation of child processes (or workers) that share the server's workload. This improves performance by enabling efficient concurrency and

load balancing, particularly useful for network-heavy applications that need to handle many concurrent connections.

- **Global:** The global object in Node.js provides access to global variables and functions that can be accessed throughout the entire application without needing to import them. Common global elements include processes for interacting with the running Node.js process, and functions like `setTimeout()` and `setInterval()` for scheduling tasks.
- **Error Handling:** Node.js includes built-in mechanisms for handling errors, which is essential for ensuring stable application behavior. Errors can be caught and managed using try-catch blocks or by listening to error events, particularly in asynchronous operations. Proper error handling ensures the application remains resilient and does not crash unexpectedly.
- **Domain:** The domain module was introduced to help manage errors across asynchronous blocks of code, but it has been deprecated in favor of other, more reliable patterns. While it was once useful for error handling, newer versions of Node.js recommend alternative methods for managing errors in asynchronous code.

Node.js's architecture, with its focus on modularity, efficient error handling, and scalability, makes it well-suited for developing real-time, multi-user, and high-performance applications. The combination of modules, streams, error management, and debugging tools streamlines the development process, ensuring that applications can scale and remain reliable over time.

2.1.2 Pros and Cons

2.1.2.1. Advantages of Node.js

Node.js has emerged as a key platform for developing web applications and real-time network systems, thanks to its powerful features and numerous benefits.

- **High performance:** Node.js is built on Google Chrome's V8 engine, which compiles JavaScript into native machine code. This enables it to run JavaScript with exceptional speed, making it ideal for performance-critical applications.

- **Asynchronous and Non-blocking Architecture:** Node.js uses an event-driven, non-blocking I/O model. This allows it to manage multiple operations concurrently, without waiting for tasks to finish. As a result, applications can handle many connections efficiently and remain highly responsive.
- **Unified JavaScript Language:** With Node.js, developers use JavaScript on both the client and server sides. This reduces the complexity of switching between languages, promoting better code reuse, collaboration between frontend and backend teams, and faster development cycles.
- **Node.js comes with the Node Package Manager (NPM),** offering an extensive collection of open-source libraries and modules. NPM simplifies the process of finding, installing, and managing dependencies, enabling faster project setup and more reusable components.

2.1.2.2. Disadvantages of Node.js

While Node.js offers numerous advantages, it also has certain drawbacks that developers need to be aware of when selecting it for their applications.

- **Single-threaded Limitations:** While Node.js handles concurrency well, it runs on a single thread. This can pose challenges for CPU-intensive operations like complex computations or heavy data processing, as such tasks may block the event loop and affect overall performance.
- **Callback Hell:** The asynchronous nature of Node.js relies on callbacks for handling multiple tasks. When there are many nested callbacks, the code can become difficult to read and maintain, leading to what's known as "callback hell." Though promises and `async/await` have improved this, it's still a potential drawback.
- **Not Ideal for CPU-bound Tasks:** Node.js excels at I/O-bound operations, but it struggles with CPU-intensive tasks like heavy mathematical computations. These tasks can clog the event loop, reducing the system's efficiency and responsiveness for other operations.
- **Immaturity of Tools in NPM:** While NPM offers a vast number of modules, many are community-driven and may not always meet high standards in terms

of quality, testing, or security. Developers need to be cautious when selecting third-party packages, as not all are reliable or well-maintained.

2.2. Tailwind [CSS]

2.2.1. Definition

Tailwind CSS is fundamentally characterized as a utility-first CSS framework intended for expeditious construction of customized user interfaces. Functioning as a highly adaptable, foundational CSS framework, it furnishes a comprehensive set of fundamental components, facilitating the creation of distinctive designs without the encumbrance of assertive, preconceived styles that necessitate overcoming for modification.

The inherent merit of Tailwind lies in its lack of imposition on design specifications or the visual aesthetics of a website. Instead, it offers a modular approach, wherein discrete components are seamlessly integrated to formulate a distinctive user interface. Tailwind operates by ingesting an unadorned CSS file, subjecting it to processing through a configuration file, and subsequently generating a refined output.

2.2.2. Advantages and disadvantages of Tailwind

Table 2.1. Advantages and disadvantages of Tailwind

Advantages	Disadvantages
a. Meaningful variables With Tailwind CSS, you just need to apply text-sm, text-lg, or text-xl to your HTML elements. It respectively says you want a small, large or extra-large font size. You're stopping writing any nonsense number like 15px or 18px. b. Predefined classes Another beauty related to these	a.Components aren't provided by default Tailwind CSS doesn't provide by default styled components like in Bootstrap or Bulma. You need to implement it from scratch. You'll possibly lose a lot of dev/design time. For example, Tailwind CSS doesn't provide a button, navigation bar, header, etc. b. A small learning curve

predefined classes from Tailwind CSS is that you're stopping fine-tuning your design. Because Tailwind CSS has already defined all CSS classes, you aren't able to specify any random number for your margin, padding, font-size, etc. c. Out-of-the-box Tailwind CSS features Two other Tailwind built-in features are: • Making reusable Tailwind components (without installing React in your project). • PurgeCSS is extremely easy to set up. So you can remove unused CSS classes and make your style file small.	You'll face a small learning curve with Tailwind CSS. Even if you're familiar with CSS, you need to learn the predefined classes provided by Tailwind. To apply a margin, you need to specify m-, p- for padding, leading- for line-height, etc. So, it isn't intuitive but, with practice, you'll overcome this easily. c. Mix HTML and style When you've started web development, you've taught it's a good practice to split your HTML and CSS into two files. Basically, the HTML file focuses on the structure and the CSS focuses on the styling part. In Tailwind, you don't need to write CSS rules and you apply CSS classes directly to your HTML file. So, you're mixing page structure and style in your HTML file. It's like doing old school web development.
---	---

2.3. Angular

Angular is a platform and framework used for developing single-page client applications. It takes advantage of HTML and TypeScript as its core technologies and is known for its modularity and efficiency. Here's a summary of the main concepts introduced in the text:

- Angular as a Platform: Angular is not just a framework; it's a platform for building client-side applications. It utilizes HTML and TypeScript as its foundation.

- **Angular Architecture:** Angular applications are structured around fundamental concepts. The core building blocks are Angular components organized within NgModules. These NgModules collect related code into functional units.
- **Components:** Components define views, which represent the elements displayed on a screen. They use templates with Angular directives and binding markup for rendering data and logic.
- **Services and Dependency Injection:** Services are used for logic and data that are not tied to specific views. These services can be injected into components, making the code modular and efficient.
- **Modules:** NgModules group components and services dedicated to a particular application domain or workflow. Modules can import functionality from other modules and are essential for organizing complex applications.
- **Templates, Directives, and Data Binding:** Templates combine HTML with Angular markup for modifying HTML elements. Data binding includes event binding to respond to user input and property binding to interpolate values into HTML.

2.4. Mongo Database (MongoDB)

MongoDB is an open-source document database that provides high performance, high availability, and automatic scaling. A document, or record, in MongoDB is a data structure made up of field and value pairs. JSON objects and MongoDB documents are comparable. Other documents, arrays, and arrays of documents are also possible field values. MongoDB utilizes the collection and document concepts.

- **Database** - A physical container for collections is a database. The file system receives a unique collection of files for each database.
- **Collection** - A collection of documents stored in MongoDB. It is comparable to an RDBMS table. A schema is not enforced by collections. A collection of documents may contain various fields. A group of documents often all serve the same or related purposes.

- Document - A document is a set of key- value pairs. Dynamic schema exists in documents. Using a dynamic schema allows for the possibility of different types of data to be stored in the common fields of documents belonging to the same collection.

Data is saved in MongoDB's document-oriented storage as documents in the JSON format. Any attribute can be used to index it. We can also list the applications for MongoDB:

- Big Data
- Content Management and Delivery
- Mobile and Social Infrastructure
- User Data Management
- Data Hub

2.5. Visual Studio Code, Github

For the FIT&FRESH.VN project, using tools like Visual Studio Code, GitHub, and MySQL will help in building a robust and scalable website. Here's how each of these tools can be applied:

2.5.1. Visual Studio Code (VS Code)

Role in the project: As a lightweight yet powerful source code editor, VS Code is ideal for web development.

How to apply:

Front-end development: Use it to write HTML, CSS, and JavaScript for the client-side. You can also integrate frameworks like React, Vue.js, or Angular to build dynamic interfaces for showcasing healthy food and fitness products.

Back-end development: VS Code supports various programming languages like Node.js (JavaScript) or PHP for server-side development. This will manage user authentication, order processing, and interactions with the database.

Extensions: It has a vast range of extensions, such as for Git integration, MySQL databases, and debugging tools, making it a versatile environment for both development and deployment.

2.5.2. *GitHub*

Role in the project: GitHub will serve as the version control and collaboration platform for the development of FIT&FRESH.VN.

How to apply:

Version control: Every feature or improvement you develop can be tracked using Git. This ensures you can roll back any changes in case of issues.

Team collaboration: If you work with a team, GitHub allows multiple contributors to work on different parts of the project through pull requests, branches, and code reviews.

Project management: You can utilize GitHub Issues and GitHub Projects to track progress, manage tasks, and organize the development of features like product pages, payment systems, and user management.

Deployment: GitHub Actions can automate testing, building, and deployment, ensuring a smooth and continuous integration pipeline for the website.

CHAPTER 3. SYSTEM ANALYSIS AND DESIGN

3.1. System analysis

Table 3.1. Analyze the system prior to initiating the construction of the Fit&Fresh website

Business Objectives	System Functions	Information Requirements
Product Display	Digital Product Catalog	Dynamic Website
Product Information Supply	Product Database	Product Description, Inventory Quantity, Inventory Level
Execute a Transaction	Shopping Cart/Payment System	Secure Credit Card Payment; Multiple Payment Options
Provide Post-Sale Customer Support	Sales Database	Customer Code, Product, Payment Date, Delivery Date, Payment Method
Coordinated Marketing/Advertising	Server for Advertising, Email Management, Marketing Campaign Management Software	Behavioral Log on the website of potential customers and customers linked to email and advertising campaigns.
Monitoring Marketing Effectiveness	Website Tracking and Reporting System	Number of Unique Visitors, Pages Accessed, Products Purchased, Identified by Marketing Campaign.
Personalization/Customization of	On-Site Customer	Customer Access Log, such as the

meals	Monitoring	sequence of visited web pages
Engaging Customers in Conversation	Blog on the website	Software capable of viewing featured articles
Customer Information Collection	Customer Database	Name, Address, Phone, and Email

3.2. System Design

Table 3.2. Functional Requirements and Non-Functional Requirements

Functional Requirements: Functional Requirements define what the system should do. These requirements will give us a complete picture of the features and functionality the system must provide to meet the end user's needs.	Allow users to register and log in: The system allows users to register for a new account, can log in with email and password, supports login via social networks (Google, Facebook, etc.), supports forgotten password and password recovery via email.
	View All Products (Admin): Admins have the right to view the entire product list, including hidden or unpublished products. View Available Products (Customer): Customers can view products that are publicly available on the website (excluding hidden or pending approval products).
	Payment (Admin): Manage Payment Methods: Admins have the ability to add, edit, or delete available payment methods. View Payment Transactions: Admins can view and monitor all payment transactions, including successful, pending, and failed payments.

	Process Refunds: Admins can issue refunds for completed transactions as per the return or cancellation policies. Manage Payment Gateways: Admins have control over integrating and configuring payment gateways. View Payment Reports: Admins can access detailed payment reports, including revenue, failed transactions, and payment method usage. Set Payment Rules and Discounts: Admins can define special payment rules such as discounts, promotional codes, and tax regulations. Payment (Customer): Select Payment Method: Customers can choose from available payment options (e.g., credit card, PayPal, bank transfer) during the checkout process.
--	---

	Secure Payment Processing: Customers' payment details are securely processed through a trusted payment gateway. Payment Confirmation: Customers receive an instant confirmation upon successful payment, including a receipt or order confirmation email. View Payment History: Customers can view their payment history, including details of past purchases and receipts. Request Refunds: Customers can request refunds or cancellations based on the company's return and refund policies. Apply Discounts or Coupons: Customers can apply valid discount codes or coupons at checkout to receive price reductions. Allow users to add products to the shopping cart: Users must be able to add, remove, and update items in the shopping cart.
--	---

	The system should calculate total costs, taxes, and discounts during checkout. It must provide payment options such as credit card, debit card, and e-wallets. Users must receive order confirmation after completing a purchase.
	Product Catalog Management (For Admin): The system must allow admins to add, edit, and delete products, including details such as name, description, price, nutritional information, and images. Products must be categorized into different types such as healthy meals, nuts, beverages, milk, snacks, etc.
	Order Management (For Admin): Users must be able to view their order history and track the status of current orders. Admins should be able to manage orders, update their status (processing, shipped, delivered), and handle returns or refunds.
	Nutrition Consultation: The system should offer personalized nutrition consulting services based on the user's dietary needs

	and preferences.
	Shipping and Delivery: The system must provide shipping options and calculate shipping costs based on location. Users should receive real-time tracking updates for deliveries.
	Promotion discounts: The system must support discount codes and promotional offers. Admins should be able to create, edit, and remove promotions.
Non-Functional Requirements: Non-functional requirements (NFRs) focus on factors that enhance the performance of a system rather than its specific functions. These requirements address scalability, reliability, and security.	Security: The system must use encryption (SSL) for secure payment transactions. User data (especially payment and personal information) must be securely stored and protected from breaches.
	Scalability: The system must be scalable to accommodate increasing traffic, data volume, and new features as the business grows.
	Usability: The website should have an intuitive, easy-to-

	navigate user interface. It must be mobile-responsive, ensuring proper functionality on smartphones and tablets.
--	--

Figure 3.1. Design logic for the FIT&FRESH.VN Website

(Source: Authors' source)

Table 3.3. Description

	Description
Customers of the Website	This block represents users interacting with the website through HTTP requests.
Login Confirmation	The process where user credentials are verified. It communicates with the Customer Database to retrieve and confirm customer information.
Homepage	After a successful login, the system displays the homepage. This process pulls data from the Product Category Database to show relevant product categories.
Purchasing	This process deals with placing orders. It

	connects with both the Product Category Database (for product details) and the Purchase Database (to store order information).
Shipment	After the order is placed, the system handles the product shipment and sends confirmation of successful delivery back to the customer.
Databases	Customer Database: Stores customer information.
	Product Category Database: Stores product information, categorized by type.
	Purchase Database: Records Purchase transactions.
Main Database	There is a central database likely consolidating information from the individual databases for backup or broader use.

Figure 3.2. Business Data Flow Diagram of FIT&FRESH.VN

(Source: Authors' source)

3.3. Requirements

General Layout and Structure

The website features a visually appealing and accessible design with content that conveys clear meaning. The primary layout components include a Header, Footer, and a main content area that adapts to different screen sizes for a seamless experience across devices. Pages are interconnected with intuitive links, enabling users to navigate easily and perform actions aligned with their intentions.

Account and Login System

To facilitate online purchases, the website prompts customers to create an account or log in with an existing account when necessary, with reminders to encourage registration.

Product Display and Categorization

Products are organized by categories and subcategories (e.g., healthy snacks, nuts), allowing customers to quickly find items based on their preferences and needs. A search function enables efficient product discovery, streamlining the shopping process. Product details, such as name, description, price, nutritional information, and ingredients, are displayed in a clear and concise manner, highlighting essential information for customers.

Shopping Cart and Order Process

Customers can easily add or remove products from their shopping cart. The order process includes the ability to modify the cart, enter delivery details, select a payment method, and apply discounts (if available). Shipping costs are automatically calculated based on the delivery address, and the total cost is clearly displayed before finalizing the purchase.

Content about Fit&Fresh.vn

Information about Fit&Fresh.vn, such as introduction, policies, terms, and contact details, is readily accessible across the website, ensuring customers can easily find important information when needed. The website provides clear, well-organized content to ensure users understand the business's values, mission, and offerings.

By adapting the layout and features to a healthy lifestyle audience, Fit&Fresh.vn will offer a seamless, user-friendly shopping experience tailored to the needs of eat clean and gym enthusiasts.

3.4. User roles and permissions

Table 3.4. User roles and permission

	User permissions	Non registered users	Registered user	Manager
PURCHASING	View products	X	X	
	Filter products		X	
	Add to cart		X	
	Update cart		X	
	Delete a Product from the Shopping Cart		X	
	Order		X

3.5. Business Process Modeling Notation (BPMN)

3.5.1. BPMN sign up/ login

Figure 3.3. BPMN Login Process

(Source: Authors' source)

This diagram illustrates the login and password recovery process. The user interacts with the login interface. If the user selects "Register" and does not have an account, they are prompted to create one. If the user already has an account, they input their username/email and password. If the user clicks "Forgot password," they are asked to input their username/email. Once validated, the system generates an OTP (One-Time Password) and calls the SMS provider to deliver the OTP to the user's phone.

After entering a valid OTP, the user is prompted to input a new password and confirm it. The system checks if the passwords match. If they do, the new password is stored in the database. Finally, the user is redirected to the homepage screen.

3.5.2. BPMN process for adding a product to a cart

browsing. If they choose to buy, the checkout process begins; if they continue, they return to the product page.

3.5.3. BPMN order procedure

Figure 3.5. BPMN order procedure

(Source: Authors' source)

In our simple and convenient ordering process, you can easily review and customize your healthy food choices. Start by checking your shopping cart, where you can update product information, adjust quantities, or remove items as needed. You'll also have access to available discount coupons to make your purchase even more budget-friendly.

Once you're happy with the items in your cart and have confirmed the total order amount, just click the **“Buy”** button to proceed. Next, enter your shipping information to ensure timely delivery. Before finalizing, you'll have an opportunity to review all order details one last time. If anything needs adjusting, simply return to the cart to make quick edits.

Once everything is correct, proceed to the final step by choosing your preferred payment method and clicking **“Order”**. At this point, your healthy food order will be confirmed, and you'll receive an **“Order Successfully”** notification.

3.5.4. BPMN Payment Procedure

Figure 3.6. BPMN Payment Procedure

(Source: Authors' source)

This BPMN diagram outlines a general payment process in FIT&FRESH.VN. The user begins by viewing the payment invoice and selects a payment method, which could be e-wallet, banking, or cash on delivery. If banking is chosen, the system checks for a

linked card and, if needed, prompts the user to link one by providing bank information and confirming via OTP. After attempting payment, the system checks for success. If the payment is successful, the invoice status is updated and the user is notified; if not, a failure message is displayed. The process concludes when the payment or order is processed.

3.5.5. BPMN account information management

Figure 3.7. BPMN account information management

(Source: Authors' source)

Efficiently managing account information is a fundamental aspect of user interaction in various systems and applications. The BPMN process for managing account information is a structured workflow that begins with users accessing their account details. It offers the option to edit information and log out. If users choose to edit, they can 'save changes' or return to the account screen. 'Logging out' concludes the process, ensuring account security. This BPMN model provides a clear visual representation of the account management process, facilitating understanding and control.

3.6. Use case

Table 3.5. Use case and description

Use case	Description
User	
Sign up	Users create a new account by providing details such as name, email, and password.
Login	Users have a registered account and log into the system with their account credentials.
Log out	User session is terminated and users log out of the system.
Account Information Management	Users can view and update personal information and change their password.
Searching for Products	Products related to the search term are displayed, users can search for products by name.
Viewing Products by Price	Users filter products based on price range.
Viewing Products by Categories	Users can browse products by category.

Viewing Product Information	Users can view detailed information about a product.
Adding Products to Shopping Carts	Users select a product and add to their shopping cart.
Order Creation	User has items in the cart. Users confirm their order and checkout.
Order Information	Supplementing, modifying recipient information, payment method, and adding notes before placing an order.
Using a Coupon	Users can apply a discount code during checkout.
Payment	Users select a payment method and complete the payment.
Order Cancellation	Users can cancel their order if within the allowed period.
Exploring Blog and Articles	Users view articles, blogs, and "About Us" content.
Payment Intermediary	
Payment	The payment intermediary facilitates and processes payments between the customer and Fit&Fresh.vn, ensuring secure transactions.
Admin	
Log in	Administrator logs into the system with their account.
Log out	Administrator logs out of their account from the

	system.
Category Management	Admin adds, deletes, and edits product categories.
Product Management	Admin adds, deletes, and edits products.
Coupon Management	Admin creates, modifies, or removes discount coupons.
Customer Management	Admin views, updates, or deletes customer information.
Order Management	Admin manages orders, updates order status, and coordinates.
Blog Management	Admin creates, modifies, or deletes blog articles.

CHAPTER 4. WEB DEVELOPMENT AND ORGANIZATION

4.1. Overview

4.1.1. Sitemap

Figure 4.1. Sitemap of FIT&FRESH.VN

(Source: Authors' source)

4.1.1.1. Color

			
#C0C78C	#A6B37D	#FEFAE0	#B99470
rgb(192, 199, 140)	rgb(166, 179, 125)	rgb(254, 250, 224)	rgb(185, 148, 112)

Figure 4.2. FIT&FRESH.VN's tone color

(Source: Authors' source)

4.1.1.2. Logo

Figure 4.3. FIT&FRESH.VN's logo

(Source: Authors' source)

The FIT & FRESH logo is a combination of the letter "F" and the words "your green corner." The stylized "F" incorporates a leaf icon and a wavy line, symbolizing nature and freshness. The words "FIT & FRESH" are written in a bold font, emphasizing the brand's commitment to health and quality. The overall color scheme of green and white reinforces the theme of health and sustainability. The logo represents the brand's values of providing fresh, healthy, and nutritious food.

4.1.1.3. Font

Montserrat and **Playfair Display** are two commonly used fonts in web design, each bringing a distinct style and visual character to a website.

4.1.2. Mockup Client

The FIT&FRESH.VN website includes key sections such as the Home page, which introduces products and brand values, the TDEE and BMI calculators that help customers determine their energy needs and body indices. The Products section is divided into categories like Beverages, Meals, Snacks, Nuts and Milk, making it easy for customers to find what they need. The Cart and online payment features make the shopping process more convenient. The website also includes sections like About Us, FAQs and a Blog that shares health information, helping customers improve their nutritional knowledge. Account management and password recovery features enhance the user experience and convenience. Overall, FIT&FRESH.VN is not only a place to shop but also provides valuable resources to support customers in improving their health and building a strong connection with the brand.

Figure 4.4. FIT&FRESH.VN's mockup client

(Source: Authors' source)

4.1.2. Mockup Admin

The admin panel of the FIT&FRESH.VN website includes key sections such as Customer Management, Products, Orders, Promotions, Blog, and Overview. Admins can manage customer information, update products, track orders, create discount codes, and post blog articles. The Overview section provides statistics on sales and site performance. On the left side of the page is a navigation bar that allows admins to quickly access management sections, while the right side displays details of these sections. This admin panel helps admins manage efficiently and enhance the user experience on the website.

Figure 4.5. FIT&FRESH.VN's mockup admin

(Source: Authors' source)

4.2. Client Website

4.2.1. Header

Figure 4.6. Header of FIT&FRESH.VN

(Source: Authors' source)

The header includes a "FIT & FRESH" logo, a grand opening banner, and a navigation menu with links like Home, Products, and Blogs. On the right, there's a profile icon, username field, search bar, and cart icon. The color scheme combines cream, dark brown, and green, emphasizing a clean, healthy theme.

4.2.2. Footer

Figure 4.7. Footer of FIT&FRESH.VN

(Source: Authors' source)

This is the footer section of the FIT&FRESH.VN website, featuring contact information and social media links for easy connection. It includes product categories such as healthy meals and drinks, along with customer support policies like general regulations, payment methods, shipping, and privacy policies. Additionally, there is a mailing list subscription section to keep users updated on the latest promotions. The footer concludes with the website's copyright notice.

4.2.3. Sign up & Log in

On the FIT&FRESH.VN website, to shop and explore products, users need to register and log in to their personal accounts. The website provides two interfaces for registration and login, designed to make it easy for users to access services conveniently and securely.

The registration window displays clear options allowing users to quickly register using their Google, Apple, or Facebook accounts. Users can also manually create an account by entering basic information such as their username, email, and password. This interface also provides a link for users who already have an account, making it easy for them to switch to the login interface if needed.

The login window is similarly designed, allowing users to log in by entering their email or username and password. Quick login options through Google, Apple, or Facebook are also available, saving time for those who use third-party services. This window also supports users with a "forgot password" feature, allowing them to regain access if they forget their login information. Additionally, the login window links to the registration interface so that if users do not have an account, they can easily switch to the registration interface.

THƯỜNG THỨC

Không cần phải lo lắng về việc đi chợ hay nấu nướng, chỉ cần ngồi lại, thư giãn và thưởng thức bữa ăn tuyệt vời của bạn!

Figure 4.12. FIT&FRESH.VN's Homepage

(Source: Authors' source)

The "Homepage" of the Fit & Fresh website provides an inviting and visually engaging experience for users. The large, bold header "Fresh Food & Great Health" immediately communicates the brand's focus on healthy and delicious meals. Bright images of colorful dishes make the homepage appealing, while the message emphasizes Fit&Fresh's mission to not only provide great meals but also support a healthier lifestyle.

Scrolling down, the "Order Process" section makes it easy for users to understand how to place an order. Each step, such as selecting a product, preparation, delivery, and enjoying the meal, is depicted with images and short descriptions, making the process clear and user-friendly.

Further down, the "Popular Dishes" and "Always Fresh" sections present a range of healthy products Fit&Fresh offers, from fresh salads to nutritious snacks. The consistent use of soft green tones and vivid images enhances the feeling of freshness and healthfulness throughout the homepage.

Lastly, the "Latest Reviews" section at the bottom of the page showcases customer testimonials, adding social proof and emphasizing customer satisfaction. The overall layout of the homepage, with its well-placed visuals and thoughtful content, helps build a sense of trust and excitement about the brand.

4.2.5. About Us

Figure 4.13. FIT&FRESH.VN's About Us Page

(Source: Authors' source)

The Fit & Fresh website offers a delightful experience with a friendly interface and fresh colors. The "Grand Opening" banner stands out with vibrant green tones and images of fresh dishes, drawing attention to the brand's exciting launch in November 2024.

The "About Fit & Fresh" section highlights the brand's mission of promoting a healthy lifestyle with fresh, nutritious products. The images of the food help users easily recognize the quality and freshness, while the balanced layout and soft green background make exploring the site enjoyable.

4.2.6. All Products

This website is an online store displaying healthy food products, helping users easily search for and choose products that suit their needs. At the top of the page, there is a title "Delicious Food Menu" with a logo and images representing healthy dishes like salads, sandwiches, and nutritious meals. Additionally, there is an "Order Now" button for immediate ordering and a contact phone number. On the left, there is a vertical filter bar, allowing users to select categories like "Milk," "Nuts," "Snack," "Meals," and "Beverage," as well as filter products by price and size. This helps users narrow down their search to specific products.

The main section of the page displays products organized into major categories like "MEALS," "BEVERAGE," "MILK," "NUTS," and "SNACK." Each category has a distinct title with a light green background, making it easy for users to identify. The product cards within each category include the product's image, name, and price, neatly arranged in rows. Above the product list, there are sorting options like "New," "Price Ascending," "Price Descending," and "Rating" to help users easily sort according to their preferences. Each page is designed to display a maximum of 12 products, and if there are more than 12, they will be divided across multiple pages for easy browsing. This interface gives users a comprehensive view of various products, from beverages to snacks, milk, and nutritious nuts.

4.2.7. Product Categories

4.2.7.1. Healthy Milk

The "Product Category - Healthy Milk" webpage introduces a range of nutritious milk products with an attractive design. At the top of the page is a large banner with the slogan "DRINK MILK TODAY AND FEEL THE FRESH SWEETNESS!" along with images of appealing milk bottles, which make a strong impression and encourage customers to choose milk products. The banner uses bright colors and vivid images, creating a sense of energy and health.

The main section of the page displays a list of various types of milk, presented in a grid format with clear product images and basic information such as product names and prices. The milk products include oat milk, rice milk, soy milk, and almond milk, all of which are healthy options and come in a variety of flavors, such as sugar-free, sweetened, or special types like oat milk with coffee. The well-organized layout and soft colors make it easy for customers to choose the products that best suit their nutritional needs.

Figure 4.15. FIT&FRESH.VN's Healthy Milk Category Page

(Source: Authors' source)

4.2.7.2. Healthy Snacks

The "Snack Menu" page on the website introduces a variety of healthy snack products with an attractive design. At the top of the page, there is a large banner with the message

"SNACK MENU - TODAY'S SPECIAL!" along with featured snack products and a "Buy 1 Get 1" promotion. Below the message, there is also contact information for the store, including the address and phone number, making it easy for customers to learn more and place orders. The images of snack products like rice cakes, cookies, and raisins add appeal to the website, encouraging customers to explore more snack options.

The main product section includes various healthy snacks such as brown rice cakes, golden raisins, corn cakes, multigrain bread, oat cookies, and granola bars. Each product is presented with an eye-catching image and price information, making it easy for customers to find suitable products. The clean layout and soft colors of the page make it user-friendly, allowing customers to explore products and make purchasing decisions conveniently.

Healthy Milks

Figure 4.16. FIT&FRESH.VN's Healthy Snacks Category Page

(Source: Authors' source)

4.2.7.3. Healthy Nuts

The "Vegan Nuts Delight" page showcases a variety of healthy nut products, designed to attract customers with a vibrant banner at the top. The banner features the headline "VEGAN NUTS DELIGHT!" and highlights various nut flavors available, such as roasted cashews, macadamia nuts, salted almonds, and others, along with a discount offer of "Up to 35% off." Contact information is also provided, making it easy for customers to get in touch with the store. The combination of promotional offers and appealing product images effectively grabs attention and encourages customers to explore more.

The main product section features different types of healthy nuts, including roasted almonds, macadamia nuts from Dak Lak, organic chia seeds, salted cashews, and mung beans. Each product is presented with an elegant image and the corresponding price, allowing customers to browse easily and find products that suit their preferences. The clean and minimal design, with soft, calming colors, creates a user-friendly shopping experience that helps customers make informed purchasing decisions effortlessly.

Healthy Nuts

Figure 4.17. FIT&FRESH.VN's Healthy Nuts Category Page

(Source: Authors' source)

4.2.7.4. Healthy Beverage

The "Healthy Beverage" page stands out with an impressive banner at the top, titled "BEVERAGE MENU" with a promotion of "Up to 50% Off." This banner combines images of various beverage products like strawberry ginger tea and fruit juice, accompanied by a "Buy Now" button and essential contact details, including a phone number, website, and address. This header not only gives a professional impression but also grabs customers' attention and stimulates curiosity about the products.

Below the banner, the "Healthy Beverages" section displays a wide variety of drinks with elegant, professional images. Each product card includes the product name, a short description highlighting health benefits (such as "high in vitamins" or "high in fiber"), and the price shown clearly in VND. The product lineup includes lime juice, dragon fruit juice, mushroom coffee, strawberry ginger tea, peppermint green tea, and green tea. With a minimalist design and soft pastel colors, the page offers a pleasant and friendly shopping experience, making it easy for users to choose suitable healthy beverage options.

Figure 4.18. FIT&FRESH.VN's Healthy Beverage Category Page

(Source: Authors' source)

4.2.7.5. Healthy Meals

The "Healthy Meal Prep Services" page presents a vibrant banner at the top, featuring the title "HEALTHY MEAL PREP SERVICES" along with key benefits like customizable meal plans, fresh ingredients, and a health-focused approach. A promotional offer of "35% OFF" is highlighted alongside a colorful meal image, drawing attention to the advantages of healthy, convenient meal prep. Essential contact information, including a phone number, is also provided for easy communication.

Below the banner, the "Healthy Meals" section showcases a selection of nutritious meals with beautifully styled images. Each product card displays the meal name, a brief description emphasizing its healthy qualities, and the price in Vietnamese Dong (VND). The meal options include tuna salad, beef salad, grilled chicken salad, shrimp salad, grape seaweed salad, and a mixed salad with beef, chicken, and eggs. The layout is clean and minimal, with soft, calming colors, providing a pleasant browsing experience that encourages customers to explore nutritious meal options that fit their lifestyle.

Figure 4.19. FIT&FRESH.VN's Healthy Meals Category Page

(Source: Authors' source)

4.2.8. Product Detail

After clicking on a product card, the detailed product information will be displayed as shown in the image. On the FIT&FRESH.VN website, this product detail page provides all the necessary descriptions and information to help users fully understand the product they are interested in. For example, the "Brown Rice Steamed Bun" page shows the

product name, price, and the option to select the desired quantity. Users can then click the "Add to Cart" button to proceed with adding the product to their shopping cart.

Additionally, there is a "Buy Now" button, allowing users to directly proceed to the checkout for that specific product without needing to add it to the cart first. This provides a more efficient shopping experience for those who want to make quick purchases. On the left side of the page, there is a vertical menu displaying various product categories, as well as a section showcasing promotional products, which helps users navigate and discover related offers. At the bottom of the product detail page, similar products are suggested, making it easier for users to explore other options within the same category, enhancing their shopping experience.

Figure 4.20. FIT&FRESH.VN's Product Details web page

(Source: Authors' source)

4.2.9. Menu

The **Weekly Menu** page displays a curated selection of healthy meals, organized by day and meal times (morning, noon, evening) to help users easily plan their weekly diet. Each day features individual meal blocks with the meal name, description, and highlighted nutritional information (calories and macronutrient breakdown), along with a “NEW” badge for recently added dishes.

Users can navigate between weeks using the "Previous Week" and "Next Week" buttons, making it easy to plan ahead. For each meal, users can click "Order Now" to add items directly to their cart, streamlining the ordering process. A "Note" section at the bottom provides essential information on ingredient sourcing, calorie calculation, and storage instructions, ensuring users have a clear understanding of their meal choices. This page is designed for quick selection, nutritional transparency, and convenience, catering to health-conscious customers.

YOGA VÀ CHẾ ĐỘ ĂN UỐNG

Yoga dạy bạn điều gì về ăn uống lành mạnh?

Ăn uống lành mạnh là một phần quan trọng của việc thực hành yoga. Cùng FIT&FRESH tìm hiểu chế độ ăn phù hợp cho những người tập yoga, giúp cơ thể và tâm trí luôn cân bằng và khỏe mạnh.

1. Chế độ ăn uống cho người tập Yoga

Yoga không chỉ là về các động tác thể chất mà còn liên quan đến chế độ ăn uống lành mạnh và cân bằng. Người tập yoga thường chú trọng vào những thực phẩm tự nhiên, sạch và ít chế biến. Chế độ ăn này giúp giữ cho cơ thể dẻo dai, tâm trí bình an, và năng lượng ổn định suốt cả ngày.

2. Lợi ích của chế độ ăn uống lành mạnh khi tập Yoga

- ✓ Giúp cơ thể giữ sự nhẹ nhàng và linh hoạt, điều cần thiết cho các động tác yoga đòi hỏi sự dẻo dai.
- ✓ Ăn uống đúng cách còn giúp tâm trí bình tĩnh và tập trung, hỗ trợ cho việc thiền định và các bài tập hít thở trong yoga.

3. Những thực phẩm tốt nên có trong chế độ ăn của người tập Yoga

Một số thực phẩm tốt cho người tập yoga bao gồm rau xanh, các loại hạt, trái cây tươi và các nguồn protein tự nhiên như đậu phụ và hạt quinoa. Những thực phẩm này không chỉ cung cấp năng lượng mà còn giúp thanh lọc cơ thể và hỗ trợ quá trình phục hồi sau khi tập luyện.

Figure 4.23. Blog/Article Sub-page of FIT&FRESH.VN

(Source: Authors' source)

This Blogs/Articles page of the Fit & Fresh website is designed to inspire a healthy lifestyle through informative articles. It features categories like nutrition, healthy eating, and weight management, with highlighted posts and interactive tabs for easy navigation. Engaging visuals promote wellness, while the header and search bar allow quick navigation to other parts of the site. Overall, it serves as a user-friendly hub for health and wellness content.

4.2.11. Cart

Figure 4.24. Cart Page of FIT&FRESH.VN

(Source: Authors' source)

This is a shopping cart page for an online store named "Fit & Fresh". It displays the items selected by the customer, including product images, names, quantities, and prices. Users can adjust the quantities of products, view the updated total, and proceed to checkout. The design uses a soft green gradient theme to promote a fresh and healthy vibe.

4.2.12. FAQs

Figure 4.25. FAQs of FIT&FRESH.VN

(Source: Authors' source)

This **FAQs page** provides users with all the essential information they need to navigate FIT&FRESH.VN. Each question is clearly listed, expanding to offer detailed answers on topics such as placing orders, delivery services, subscriptions, and more. Users can quickly find guidance on how to choose products, add them to their cart, and proceed to checkout with flexible payment and delivery options. Information on subscription plans is also provided, helping users set up regular meal deliveries tailored to their dietary needs.

The page includes details on how to contact customer support for further assistance and outlines FIT&FRESH's return policy for added reassurance. Additionally, users can learn how to stay updated on new products and exclusive offers by subscribing to the newsletter or following FIT&FRESH.VN on social media. Concluding with a welcoming message, the FAQs page emphasizes FIT&FRESH's commitment to supporting a healthy lifestyle, ensuring users have a smooth and informed experience on the platform.

The **Ordering Process** section at the bottom guides users through each step of placing an order, from choosing fresh, healthy meals to having them delivered to their door. Each step is paired with visuals and brief descriptions, making the process straightforward. This section highlights the ease of enjoying nutritious meals without the need for cooking or meal prep, encouraging users to embrace a healthier lifestyle. The FAQs page concludes with a welcoming message that underscores FIT&FRESH's dedication to a seamless and enjoyable experience for all customers.

4.2.13. Review

The image is a customer review page for FIT&FRESH.VN, titled "WHAT CUSTOMERS SAY ABOUT FIT&FRESH.VN". It showcases positive feedback from customers, including a consultant, student, and singer, who share their satisfaction with the products. At the bottom, additional reviews from celebrities enhance the brand's credibility. The design is simple, focusing on trust and quality.

Figure 4.27. Payment web page of FIT&FRESH.VN

(Source: Authors' source)

This checkout page is designed to guide users through the final steps of purchasing items. It starts with a section for entering delivery information, such as email, name, phone number, address, district, and street. Below this, the chosen product is displayed with its image, name, price, and quantity selector, allowing users to adjust the quantity directly.

Users have the option to add product damage insurance for an additional fee. There's also a section for applying discount vouchers, with available options clearly listed, and users can input a code if they have one. On the right side, users can select their preferred payment method, including options like Momo, bank transfer, or cash on delivery.

The shipping method is displayed next, with cost and estimated delivery time. At the bottom, the order summary provides a clear breakdown of the total, including item cost, shipping fees, discounts, and the final amount due. Once all details are confirmed, users can proceed by clicking the "Place Order" button, or go back to adjust their selections if necessary.

4.2.15. Account

The "Account Information" section of the FIT&FRESH website is designed to help users easily manage their personal details. The page features a clean, user-friendly layout with soft colors and structured formatting. Users can update their email and phone number, enter their full name, select their gender, and input their birth year. The section also allows users to upload an avatar image, providing a personalized experience. The design aligns with FIT&FRESH's commitment to simplicity and accessibility, using intuitive buttons and fields for smooth navigation.

4.2.16. TDEE Calculator

TÍNH TDEE Online cùng FIT&FRESH

TDEE là gì?

TDEE (Total Daily Energy Expenditure) là tổng năng lượng bạn tiêu thụ mỗi ngày. Nó bao gồm năng lượng tiêu thụ khi nghỉ ngơi, năng lượng tiêu thụ khi hoạt động và năng lượng tiêu thụ khi tiêu hóa thức ăn.

Việc tính toán TDEE giúp bạn biết được lượng calo cần thiết để duy trì cân nặng hiện tại, giảm cân hoặc tăng cân.

Tại sao bạn cần phải tính toán?

Việc tính toán TDEE giúp bạn có kế hoạch ăn uống và luyện tập hợp lý, trong đó:

- Giúp bạn duy trì cân nặng hiện tại.
- Giúp bạn giảm cân một cách khoa học.
- Giúp bạn tăng cân một cách lành mạnh.

Hãy sử dụng công cụ tính TDEE của FIT&FRESH để có kế hoạch dinh dưỡng và luyện tập phù hợp nhất cho bạn.

Figure 4.32. TDEE Calculator web page of FIT&FRESH.VN

(Source: Authors' source)

This webpage is a TDEE (Total Daily Energy Expenditure) calculator designed to help users estimate the calories they need daily to meet their fitness goals, such as losing weight, maintaining weight, or gaining muscle.

Users input their information, such as goal, age, gender, height, weight, and activity level. The page allows users to select their fitness goal and workout intensity, and enter their target weight. Once the information is entered, clicking "**Calculate TDEE**" provides an estimate of daily calorie requirements.

Below the calculator, there's a nutrition knowledge section with articles related to health and wellness, such as the importance of sleep, mindful eating for diabetics, and benefits of a plant-based diet. This section aims to offer users additional guidance on making informed, healthy lifestyle choices.

4.2.17. BMI Calculator

TÍNH BMI Online cùng FIT&FRESH

BMI là gì?

Chỉ số BMI (Body Mass Index) được tính dựa trên tỉ lệ giữa cân nặng và chiều cao bình phương, nói lên tình trạng cân nặng hiện tại của bạn. So với giá trị BMI tiêu chuẩn, chỉ số BMI có thể xác định một người đang thừa cân, thiếu cân hay có cân nặng cân đối.

Chỉ số BMI càng cao thì lượng mỡ trong cơ thể càng nhiều, dẫn tới nhiều nguy cơ phát sinh bệnh lý, vấn đề sức khỏe nghiêm trọng. Các bệnh thường gặp ở người cân nặng quá khổ là béo phì, huyết áp cao, bệnh tim mạch, tiểu đường... Ngược lại nếu chỉ số BMI thấp, người bệnh cũng có nguy cơ gặp phải các vấn đề thiếu máu, miễn dịch kém hay loãng xương.

- Chỉ số BMI được tính theo công thức:

BMI = cân nặng (kg) / chiều cao² (m)

- Chiều cao tính bằng mét
- Cân nặng tính bằng kg

CÔNG CỤ TÍNH BMI ONLINE

Cho chúng mình xin thông tin chiều cao và cân nặng để tính BMI và cân nặng lý tưởng cho bạn nhé!

Lưu ý: Công thức BMI được áp dụng cho cả nam và nữ, áp dụng cho người trưởng thành (trên 18 tuổi). Không áp dụng cho phụ nữ mang thai, vận động viên, người già và có sự thay đổi giữa các quốc gia.

Chiều cao

This section aims to offer users additional guidance on making informed, healthy lifestyle choices.

4.3. Admin Website

4.3.1. Log in web page

Each administrator will have an account to log in to perform operations to manage the entire business process, products, and content displayed on the website. Only when the administrator logs in can these operations be performed. The login page also clearly displays necessary information fields, such as account and password.

Figure 4.34. Login admin

(Source: Authors' source)

4.3.2. Homepage

The home page of the website admin will display information about total revenue and related charts showing the results of a business process. This can help administrators

easily make business decisions and strategies in the near future. All information is displayed on the first visit, providing an overview of the necessary information without having to look any further.

Figure 4.35. Homepage admin

(Source: Authors' source)

4.3.3. Customer management

A list of customers who have experienced ordering at FIT&FRESH.VN will be displayed on this website. Each customer will be displayed by line, and basic customer information will also be compiled and displayed clearly. In addition, there will be a column summarizing the number of customer orders so that administrators can have gifts and special promotions to thank and retain customers.

The screenshot shows the 'DANH SÁCH KHÁCH HÀNG' (Customer List) page. The table has the following data:

Họ và tên	Email	Số điện thoại	Địa chỉ	Tổng số đơn hàng
Tô Nguyễn Tường Vy	tuongvy1744@gmail.com	0369438828	68/16, Hẻm 68, Đường số 8, Linh Xuân, Thủ Đức, Thành phố Hồ Chí Minh	10
Trần Thị Thủy Lợi	doitranthi123@gmail.com	0817948093	Himlam Riverside, Quận 7, Thành phố Hồ Chí Minh	20
Nguyễn Huỳnh Kim Sương	suongkuy2211@gmail.com	0985063492	Khu đô thị Vạn Phúc, Thủ Đức, Thành phố Hồ Chí Minh	5

Figure 4.36. Customer management

(Source: Authors' source)

4.3.4. Product management

Administrators can manage products on this website. Products will be fully displayed in rows, and administrators can also easily filter by each product category. For each product, administrators can perform operations including updating, editing, and deleting. Furthermore, you can create new products right on this page. From the product management website, administrators can link to related websites for editing products and viewing product details. For product editing, administrators can change any product information. Furthermore, desired promotions can be applied to that product.

The screenshot displays the 'DANH MỤC SẢN PHẨM' (Product Category) management page. On the left is a sidebar with navigation links: Tổng quan, Sản phẩm (active), Danh mục sản phẩm, Tất cả sản phẩm, Khách hàng, Đơn hàng, Khuyến mãi, and Blog. The main content area features a table with columns: ID, Tên danh mục, Hình ảnh, Hiện thị, and Thao tác. The table lists five product categories: Healthy Meals, Healthy Beverages, Healthy Nuts, Healthy Milk, and Healthy Snacks. Each row includes a 'Hiện thị' checkbox (all are checked) and 'Thao tác' buttons for 'Chỉnh sửa' (Edit) and 'Xóa' (Delete). At the top right, there are links for 'Sign out', 'Tìm kiếm sản phẩm' (Search product), and 'Thêm danh mục' (Add category).

ID	Tên danh mục	Hình ảnh	Hiện thị	Thao tác
01	Healthy Meals		☒	Chỉnh sửa Xóa
02	Healthy Beverages		☒	Chỉnh sửa Xóa
03	Healthy Nuts		☒	Chỉnh sửa Xóa
04	Healthy Milk		☒	Chỉnh sửa Xóa
05	Healthy Snacks		☒	Chỉnh sửa Xóa

Figure 4.37. Product management

(Source: Authors' source)

The screenshot shows the 'CHỈNH SỬA SẢN PHẨM' (Edit Product) page. The sidebar on the left is identical to the previous page, with 'Sản phẩm' highlighted. The main area contains form fields for editing: 'Tên sản phẩm:' (Product name) with the value 'Sữa yến mạch hữu cơ'; 'Danh mục:' (Category) with the value 'Healthy Milk'; 'Thông tin sản phẩm:' (Product information) as a large text area; and 'Mô tả sản phẩm:' (Product description) as a larger text area. Below these are sections for 'Hình ảnh sản phẩm:' (Product image) and 'Hình ảnh mô tả:' (Description image), each with a file upload button and a note about the 50MB limit. At the bottom are 'Lưu thay đổi' (Save changes) and 'Hủy bỏ' (Cancel) buttons. A 'Sign out' link is in the top right corner.

Figure 4.38. Revising product's information

(Source: Authors' source)

Figure 4.39. Pop-up for deleting product

(Source: Authors' source)

4.3.5. Coupon management

On this website, administrators can easily manage general promotions. Administrators can perform operations such as creating and deleting promotional codes. The number of code uses will also be displayed for administrators to easily monitor.

A screenshot of a web application showing the coupon management interface. The interface has a sidebar on the left with a logo and navigation links: "Tổng quan", "Sản phẩm", "Khách hàng", "Đơn hàng", "Khuyến mãi" (highlighted), and "Blog". The main content area has a header with "Sign out", "Tạo mã khuyến mãi mới" (Create new coupon code), and "Tìm khuyến mãi" (Find coupon code). Below the header is the title "DANH SÁCH KHUYẾN MÃI" (Coupon List). The main content is a table with the following data:

Khuyến mãi	Loại	Trạng thái	Đã sử dụng	Thời gian	Tác vụ
FA8752024	Ưu đãi vận chuyển	Đang khuyến mãi	12/24	25/08/2024	⋮

Figure 4.40. Coupon management

(Source: Authors' source)

Figure 4.41. Creating a new coupon

(Source: Authors' source)

Figure 4.42. Saving pop-up

(Source: Authors' source)

4.3.6. Blog management

Articles in FIT&FRESH.VN's Blog category will be compiled on the website. Similar to the product management page, administrators can also easily filter by topic. Here, they can also easily create new posts and update, edit, or delete posts as desired.

Figure 4.43. Blog management

(Source: Authors' source)

Figure 4.44. Revising blog content

(Source: Authors' source)

Figure 4.45. Creating new posts

(Source: Authors' source)

4.3.7. Order management

An indispensable part is managing customer orders. For orders, administrators will be able to view and update order status so customers can track the packaging and shipping process of the order. Administrators can also easily filter orders by status for easy tracking.

Mã đơn hàng	Tên khách hàng	Ngày đặt hàng	Trạng thái	Hình thức thanh toán
3KH793HP	Nguyễn Quốc Anh	10/09/2024	Đang xử lý	Chuyển khoản

3KMWUB521	Trần Minh Hiếu	4/10/2024	Đang xử lý	Tiền mặt

Figure 4.46. Order Management

(Source: Authors' source)

CHAPTER 5. CONCLUSION

5.1. Project Evaluation

5.1.1. Advantages

FIT&FRESH.VN stands out as a unique platform in the rapidly growing healthy food market, aligning closely with green living trends embraced by health-conscious consumers, especially in bustling urban areas. With increasing awareness around wellness and sustainability, FIT&FRESH.VN is well-positioned to attract customers seeking reliable, quality food options. By focusing exclusively on healthy foods, the platform distinguishes itself from general e-commerce sites, offering a specialized selection that caters directly to this lifestyle shift.

The platform's development is driven by a young, passionate team from the University of Economics and Law, motivated by a shared vision to improve the user experience in the healthy food sector. This team brings not only their enthusiasm but also a deep commitment to creating a brand that promotes health and environmental consciousness.

Their dedication is evident in every aspect of FIT&FRESH.VN, from product selection to customer service, which builds trust and resonates strongly with their target audience.

Additionally, FIT&FRESH.VN has significant growth potential. With a solid business plan and investment, it is positioned to quickly capture a substantial portion of this market niche. The platform's distinct identity and commitment to quality provide an opportunity to build a loyal customer base and scale rapidly, ensuring a competitive edge in the evolving healthy food landscape.

5.1.2. Disadvantages

One significant challenge for FIT&FRESH.VN lies in competing with established e-commerce giants like Shopee and Lazada, as well as popular social media platforms like Facebook and Instagram. Customers are already accustomed to the convenience and familiarity these platforms provide, making it difficult to persuade them to shop on a newer, independent website. This preference for well-known platforms adds a barrier to customer acquisition, as FIT&FRESH.VN must work harder to build trust and encourage first-time users.

Additionally, the website faces limitations in accessing comprehensive customer data. Unlike larger platforms that benefit from extensive data collection, FIT&FRESH.VN lacks secondary sources for understanding customer preferences and behaviors. To reach a wider audience effectively, FIT&FRESH.VN must rely on gathering its own data, a time-intensive process that requires considerable effort to refine marketing and product strategies.

As a self-built platform, FIT&FRESH.VN also experiences certain technical and functional constraints. The absence of advanced features like a chatbot for customer support, professional-grade visuals, and fully developed content can impact the overall user experience. Furthermore, without official business entity status, the team cannot register a business account, limiting payment options and potentially hindering the convenience customers expect. These factors collectively pose challenges in creating a fully competitive and engaging platform for the target market.

5.2. Future Development

In the future, FIT&FRESH.VN aims to introduce a range of new features to enhance the user experience and attract a broader customer base. Planned developments include implementing a chatbot to provide real-time customer support and guidance, making it easier for users to navigate the site and resolve questions quickly. Additionally, integrating convenient payment systems like Momo will streamline the checkout process, catering to customers' preferences for seamless, flexible payment options.

The team also plans to invest in enhancing the customer interface with further customization options, creating a more personalized shopping experience. By implementing a recommendation system, FIT&FRESH.VN can provide tailored product suggestions based on customer preferences, increasing engagement and satisfaction. These improvements are designed to make the platform more user-friendly and engaging, which will likely attract new customers, improve customer retention, and ultimately boost profitability and market share within the healthy food sector.
